

Kultr Social Media Campaign Strategy: Launch Phase

1. Introduction

This document outlines the social media campaign strategy for the launch of Kultr, a mobile-first platform designed to redefine event discovery and cultural experiences in East Africa. The strategy is crafted to leverage Kultr's unique selling propositions—its cinematic UI/UX, AI-powered personalization, and deep cultural relevance—to generate significant buzz, drive rapid user acquisition, and establish Kultr as the premier destination for events and cultural engagement across the region.

2. Campaign Objectives

Our social media campaign will focus on achieving the following measurable objectives:

- **Brand Awareness:** Generate widespread recognition for Kultr as the leading platform for East African events and cultural experiences. We aim for a 50% increase in brand mentions and a 30% increase in social media followers across key platforms within the first month post-launch.
- **User Acquisition:** Drive app downloads and user registrations. Our target is to achieve 100,000 app downloads and 50,000 active users within the first two weeks of launch.
- **Engagement:** Foster a vibrant online community around Kultr and its events. We aim for an average engagement rate of 5% on all social media posts and a significant increase in user-generated content (UGC) related to Kultr events.
- **Creator Onboarding:** Attract event organizers and merchants to list their events and products on the platform. We will measure this by the number of new creator accounts and event listings within the first month.

3. Target Audience

Our social media efforts will primarily target the following segments, reflecting Kultr's core personas:

- **The Experience Seeker (Consumers):** This demographic includes urban youth and young professionals aged 18-35, who are digitally savvy, culturally curious, and actively seek out new experiences. They are frequent users of Instagram, TikTok, and X (formerly Twitter), and are influenced by trends, influencers, and peer recommendations. They value authenticity, convenience, and visually appealing content.

- **The Culture Creator (Organizers/Merchants):** This group comprises event organizers, artists, musicians, fashion designers, and local entrepreneurs aged 25-45. They are looking for effective platforms to promote their work, reach a wider audience, and manage their events efficiently. They are active on professional networking platforms and also use Instagram and X for promotional purposes.

Geographically, our primary focus will be on key urban centers in Kenya, Uganda, Tanzania, Rwanda, Ghana, and South Africa, with a particular emphasis on Nairobi, Kampala, Dar es Salaam, Kigali, Accra, and Johannesburg.

4. Brand Voice and Messaging

Kultr's brand voice on social media will be:
